Focus: Advanced Data Structures and Algorithms | Database Management | Artificial Intelligence | Advanced Algorithm Analysis

EXPERIENCE

2016 - Present	Self Development	Boston
<ul style="list-style-type: none">• Invested in dedicated further education with B.S. in Computer Science, graduating with Honors, while simultaneously focusing on programming projects to enhance my experience in frontend and backend technologies like AWS, React.js, Node.js, NoSQL and SQL.• Provided invaluable growth allowing for application of newfound qualifications and knowledge.• Sample projects are available at http://wajeehanwar.github.io/		
2015 - 2016	Venture Development Center Potoo Full Stack Developer Marketing Strategist	Boston
<ul style="list-style-type: none">• Dual responsibility in Potoo, a social app created for community leaders to enhance member engagement, at the Venture Development Center, an acclaimed, highly selective tech startup incubator in Boston.• Grew user-base from 50 to 3000 in 2 months utilizing various approaches as marketing manager.• Developed and implemented an algorithm to identify and block negative communications based on community feedback, resulting in increased user interaction.• Implemented a scoring system to track and reward active community members, resulting in an increase of 32% user interaction.• Implemented code review sessions to improve engineering quality.		
2003 - 2015	Digital Asylum Managing Director Founder	Medford
<ul style="list-style-type: none">• Created various solutions and implementations personalized to client needs, such as designing and implementing a POS and electronic monitoring solution for a bar chain that reduced internal theft and streamlined consumables ordering decreasing bottom line loss over 80%.		
2006 - 2013	Staples Technology and Retail Manager	Cambridge
<ul style="list-style-type: none">• Drove management of technology solutions, inclusive of operations flow, resulting in above 73% YoY bottom line growth 3 years in a row.• Spearheaded sales and profit for Staples' first multi-level urban store, an exceptionally fast-paced \$5 million dollar store, while leading teams, including full P&L accountability, optimizing controllable expenses. Success was used as a model for similar urban markets.• Implemented a 3 year strategy to improve store performance, implementing Salesforce CRM, inclusive of environment, profile and user creation, resulting in an annual sales increase of 4% to \$5.2 million, customer increase of 20% to an average of 1200 customers per day, and controllable loss decrease of 60% to 0.6% of annual sales.• Created 6-month targeted sales improvement strategy resulting in improved efficiency of labor resources and an increase of \$35,000 in bottom- line sales. The strategy focused on identifying primary opportunity performance drivers and using a holistic employee engagement, while documenting customer objections and focusing on high-volume categories.• Secured multiple long-term contracts with local Cambridge businesses including Harvard University, Bikram Yoga, and Kaplan.• Developed professional relationships with top tier clients utilizing analytics from Salesforce Dashboard, Salesforce Lead Management and Salesforce Engage for tier identification and insightful engagements, resulting in building long-term relationships with a focus on client satisfaction.• Created new improvement program for progressive training, coaching, recruiting and induction, with a holistic approach to engaging employees, overhauling their value perception with individual SMART plans, incentives and recognition, utilizing Salesforce Sales Performance Management to monitor and recognize individual progress, resulting in over a 70% YOY satisfaction growth for both employees and customers.		
2001 - 2004	Exodus System Administrator Digital Island Insight CTC	Medford Brighton
<ul style="list-style-type: none">• Managed multiple Windows and Sun Solaris servers, with a focus on secure client backups and monitoring of data center operations.• Facilitated client work-order tickets in regards to server maintenance, upgrades and emergency incidents, resulting in 98% average uptime, reduction of 0.7% data loss and 98% client satisfaction.
